TEN LEADING HOSPITALS PARTNER WITH GETWELL:)NETWORK™

***GetWell:)Network to Work With Hospitals' Patient Care and Administrative Teams
to Transform Patient Care Experience***

ALEXANDRIA, VA (February 16, 2005) – GetWell:)Network™, the leading provider of patient care solutions, announced today that over the last three months it has signed multi-year agreements with ten leading hospitals to provide patients and caregivers access to its **PatientLife:)System™**, the company's patient care platform that improves patient satisfaction, enhances patient outcomes and streamlines hospital efficiencies. The client hospitals include:

- Baptist Health – Baptist Medical Center Downtown – Jacksonville, FL
- Baptist Health – Baptist Medical Center South – Jacksonville, FL
- Baptist Health – Wolfson Children's Hospital – Jacksonville, FL
- Inova Fair Oaks Hospital – Fair Oaks, VA
- Medical University of South Carolina – Charleston, SC
- Indiana Orthopaedic Hospital – Indianapolis, IN
- OSF St. Joseph Medical Center – Bloomington, IL
- The University of Chicago Comer Children's Hospital – Chicago, IL
- Thomas Jefferson University Hospital – Philadelphia, PA
- Washington Hospital Center – Washington, DC

Each hospital has already completed its installation, or is currently in process. Based on company estimates, the PatientLife:)System will reach more than 350,000 patients this year along with thousands of caregivers.

“What began as a personal experience four years ago has now transformed into a powerful mission for our organization. We are honored to have formed partnerships with each of these leading hospitals that respectively share in our mission to transform the patient care environment,” says Michael B. O’Neil, Jr., founder and CEO of GetWell:)Network. O’Neil developed the concept for GetWell:)Network while receiving treatment for cancer.

“The people throughout GetWell:)Network exhibit rare dedication to their clients' success,” says Janet Burnham, Senior Vice President of Planning at Thomas Jefferson Hospital in Philadelphia, commenting on their selection of GetWell:)Network.

PatientLife:)System™ Overview

The PatientLife:)System is an interactive patient care platform that entertains, informs and enables real-time, on-demand hospital patient communications with care staff. The system is comprised of three software suites – PatientResource:)Suite, PatientCommunication:)Suite, and PatientCare:)Suite. These integrated tools focus on enhancing the patient experience, increasing communication within care teams and informing patients about their condition during their hospital stay.

The system is built on the patent-pending PatientPathway:)Architecture™ which dynamically launches features within the system to automate clinical and non-clinical processes (e.g., patient education), to deliver a coordinated, cohesive and efficient experience for the patient.

About GetWell:)Network

GetWell:)Network™ is the leading provider of interactive patient care solutions. In partnership with more than 25 thought-leading hospitals and healthcare systems, the company is focused on transforming the care process into a patient-centric environment that drives an optimal quality care experience. This is accomplished through the deployment of the PatientLife:)System™ that turns in-room monitors into an interactive experience that informs, educates and entertains. More importantly, the platform enables hospitals to achieve their vision of delivering true patient-centered care – putting powerful, integrated services at the fingertips of patients, caregivers and hospital administrators. GetWell:)Network headquarters are in Alexandria, VA.
